Community  
of the Year**

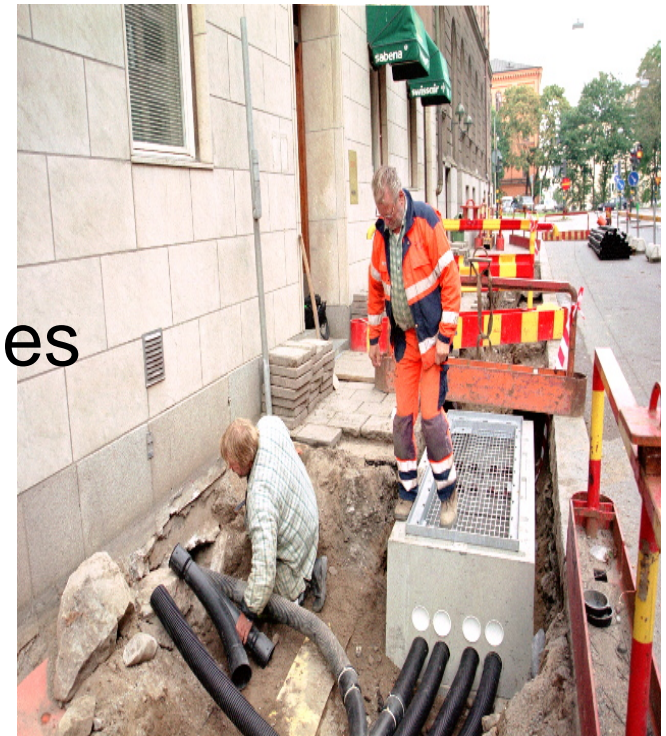

SVERIGES BÄSTA  
KOMMUNSAJT  
**2009**

# Benefits of the “Stokab model”

- One infrastructure for all
- Reduce digging
- Easy to establish new companies
- An open network
- Lease dark fibre to a fair price
- Concentrate on core business

# The vision of a World Class Stockholm

- Multifaceted and filled with experiences
- Innovative and growing
- The Stockholm of Citizens

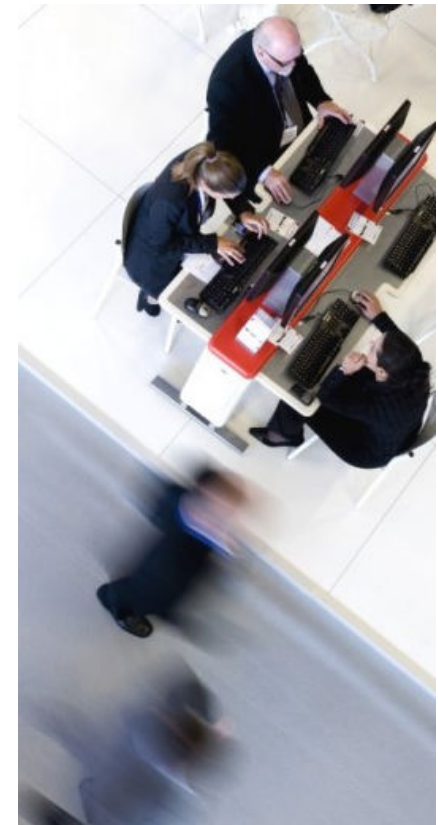

# E-STRATEGY FOR THE CITY OF STOCKHOLM

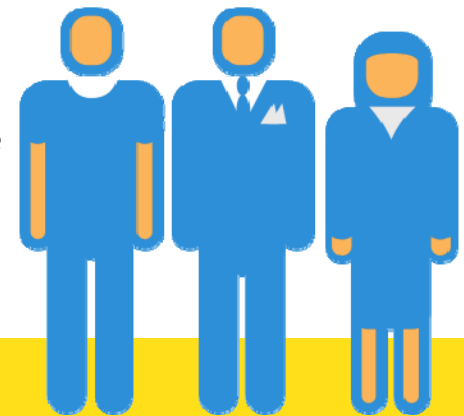

# IT plays a big role in our lives

- Internet-based service is increasingly the norm in our society.
- A well-planned and long-term focus on IT is important for the citizens of Stockholm and for development of the city's operations.
- Used in the right way information technology can help develop Stockholm to become a more attractive city in which to live and work.

# As easy as possible for as many as possible

- IT shall make it easy for citizens and companies to access quality-assured information and services.
- The City of Stockholm must be able to deliver information and services via various channels. We must be accessible to all groups!
- E-services shall facilitate contacts with the city's public administration and provide benefits for the city's operations.
