2nd FIWARE Summit

29th-31st May

Utrecht, Netherlands

Media Plaza | Jaarbeurs

***BUILDING A GLOBAL
MARKETPLACE***

fiware.org/summit/2017/

The FIWARE Summit

- **Meet and join our open community**, participating in the working meetings, to coordinate present and future activities, with the support of the FIWARE Foundation.
- **Develop the technology**. Learn from the experts through a real hands-on experience and start your certification as a FIWARE developer.
- **Go-to-market with us**. The fulfillment of the FIWARE Mission points now directly to your business. With assets and actions like the FIWARE Marketplace, the new rounds of acceleration, the iHubs and Mundus programmes, and with partnerships driving the worldwide adoption of the FIWARE standards, it is the time to join in and profit from what FIWARE is bringing to you!

The event will be organized in several tracks that will run in parallel during 3 days, including:

- FIWARE Community working groups.
- A Developer's Primer, Technical dive-in sessions and Business and Technical Coaching.
- Three different Vertical Tracks related to Agrifood, Industry and Smart Cities.
- A Conference track, targeted to business developers, decision and policy makers, startup/SME CEOs, cities' representatives, researchers, public authorities, non-profit organizations and to the whole FIWARE Community.

The detailed schedule for the FIWARE Summit is available on fiware.org/summit/2017/

Stay tuned for more info & join the conversation!
